

ODP 851-77
6 May 1977

MEMORANDUM FOR: Deputy Director for Administration

FROM : Clifford D. May, Jr.
Director of Data Processing

SUBJECT : ODP Report for Week Ending 6 May 1977

House Appropriations Committee Questions

We have assisted Office of Central Reference in responding to ten questions from the House Appropriations Committee regarding SAFE/ADISS. It is interesting to note that the Committee is now using terms like "consolidation" in discussing this area rather than "commonality" as before. In addition, we have responded to a Committee question which asked why we and DIA were not pursuing CAMS and AIRES (DIA system) as a joint development effort.

Report to IR&D Council

We are working with DIA representatives in preparing an 11 May joint briefing for the IR&D Council on joint management of SAFE and ADISS development. We have proposed that [REDACTED] (DIA) give the briefing.

Identification of Major ADP Projects

Twenty major ADP projects have been identified which are expected to exceed \$250K each in resource charges in FY-79. These projects will be reported to the Comptroller for the EAG Program review of the Agency ADP budget scheduled for June. Altogether the charges associated with these 20 projects are expected to exceed \$14M; this amounts to approximately 40% of the ODP overall resources in FY-79.

Status of [REDACTED] Mass Storage Settlement

Based upon the Termination Settlement between the U.S. Government and [REDACTED] Corporation for Project ORACLE, FY-75 obligations of \$567,228 were cancelled on 3 May 1977. Existing elapsed year ("M") account obligations will be reduced upon receipt and processing of the [REDACTED] refund check by the Office of Finance. No refund has been received in OF to date.

Data Transmission Working Group

The Data Transmission Working Group (made up of representatives of DDA and DDO) met on 2 May and selected as their pilot project to study the feasibility of transmitting T and A data from overseas bases.

Support to Director of Central Intelligence

DCITASK - Automation of two tasks for the DCI. TASK I, reporting of contacts, is scheduled to go operational next week. Training, documentation and data base preparation have been completed.

The request for storage of several DCI rapid-search tapes in one of the ODP tape libraries has been withdrawn. ODP will not store these tapes for the DCI.

Special Center Inventoried

A data storage media inventory was completed in the Special Computer Center (GC-47) on 30 April. All tapes and disks were accounted for.

Training

A two day course, OS Data Management, was completed by 15 students.

STATINTL

A three day course, Data Set Utilities, was completed by 22 students.
